

Mithaq Tafsir

First Edition

Covenant-focused study notes from the Kitab al-Mithaq corpus. Glosses are study aids, not translation authority.

Method

Source hierarchy: Qur'an, authentic Sunnah, classical tafsir, then genre-tagged secondary works.

Six axes organize loci: Allah-humanity, prophets, scripture peoples, Prophetic community, interpersonal bonds, eschatology.

No Christian covenant theology frame is imported. Contested registers are labeled, not erased.

How to Use

Begin with spine notes (40 loci), then medium cluster notes.

Pair each ayah with classical_pointers for full tafsir consultation.

Use hadith notes only after Qur'an locus; grade verify/disputed material carefully.

QUSX XML packages support machine interchange; Markdown remains the human-readable source.

Part I — Qur'an Notes (mushaf order)

Q 2:8

Axis 1 | agreed | medium | lexemes: nifaq

Hypocrites profess faith while concealing denial

Locus Q 2:8. Study gloss (not a translation authority): Hypocrites profess faith while concealing denial. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: ethical.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:14

Axis 1 | agreed | medium | lexemes: nifaq

When with believers they say we believe; with devils they wink

Locus Q 2:14. Study gloss (not a translation authority): When with believers they say we believe; with devils they wink. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:16

Axis 1 | agreed | medium | lexemes: nifaq

Trade guidance for error; profitless commerce

Locus Q 2:16. Study gloss (not a translation authority): Trade guidance for error; profitless commerce. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:21

Axis 1 | agreed | medium | lexemes: ibadah

Worship your Lord who created you

Locus Q 2:21. Study gloss (not a translation authority): Worship your Lord who created you. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological, worship.

Lexeme field: Worship is the telos of creation (51:56) and the living answer to the Alast testimony.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:27

Axis 1 | agreed | spine | lexemes: ahd, mithaq

Break Allah's ahd after ratification; sever what Allah joined

Locus Q 2:27. Study gloss (not a translation authority): Break Allah's ahd after ratification; sever what Allah joined. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 2:27 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for

ratification/breach patterns before teaching.

Hadith links: H02

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:40

Axis 3 | agreed | spine | lexemes: ahd

Fulfill My ahd; I fulfill yours (Bani Israil)

Locus Q 2:40. Study gloss (not a translation authority): Fulfill My ahd; I fulfill yours (Bani Israil). Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 2:40 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H20

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:63

Axis 3 | *agreed* | *spine* | *lexemes: mithaq*

Took your mithaq; raised the mountain over you

Locus Q 2:63. Study gloss (not a translation authority): Took your mithaq; raised the mountain over you. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 2:63 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:80

Axis 3 | nuanced | medium | lexemes: ahd

Claimed ahd that Fire touches only numbered days

Locus Q 2:80. Study gloss (not a translation authority): Claimed ahd that Fire touches only numbered days. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: nuanced. Keep textual frankness and justice together; avoid slogan collapse across axes.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:83

Axis 3 | agreed | spine | lexemes: mithaq

Mithaq of Bani Israil: worship, prayer, zakah, kindness

Locus Q 2:83. Study gloss (not a translation authority): Mithaq of Bani Israil: worship, prayer, zakah, kindness. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Axis:** 3. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 2:83 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:84

Axis 3 | agreed | spine | lexemes: mithaq

Mithaq: do not shed blood among yourselves

Locus Q 2:84. Study gloss (not a translation authority): Mithaq: do not shed blood among yourselves. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 2:84 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:93

Axis 3 | agreed | medium | lexemes: mithaq

Took mithaq; raised mountain; then worship calf

Locus Q 2:93. Study gloss (not a translation authority): Took mithaq; raised mountain; then worship calf. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:100

Axis 3 | agreed | medium | lexemes: ahd

Whenever they make ahd a party casts it aside

Locus Q 2:100. Study gloss (not a translation authority): Whenever they make ahd a party casts it aside. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:124

Axis 2 | nuanced | medium | lexemes: ahd

Ibrahim's trial; covenantal imamah charge

Locus Q 2:124. Study gloss (not a translation authority): Ibrahim's trial; covenantal imamah charge. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: nuanced. Keep textual frankness and justice together; avoid slogan collapse across axes.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:125

Axis 2 | agreed | medium | lexemes: ahd

We ahidna Ibrahim and Ismail: purify My House

Locus Q 2:125. Study gloss (not a translation authority): We ahidna Ibrahim and Ismail: purify My House. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:152

Axis 1 | agreed | medium | lexemes: dhikr

Remember Me; I remember you; be grateful

Locus Q 2:152. Study gloss (not a translation authority): Remember Me; I remember you; be grateful. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'dhikr' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:177

Axis 1 | agreed | medium | lexemes: ahd

Piety includes fulfilling ahd when pledged

Locus Q 2:177. Study gloss (not a translation authority): Piety includes fulfilling ahd when pledged. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological, ethical.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:187

Axis 5 | agreed | medium | lexemes: uqud

Marriage limits and garment language

Locus Q 2:187. Study gloss (not a translation authority): Marriage limits and garment language. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:224

Axis 5 | *agreed* | *medium* | *lexemes: ayman*

Do not make Allah a hindrance to oaths of righteousness

Locus Q 2:224. Study gloss (not a translation authority): Do not make Allah a hindrance to oaths of righteousness. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:225

Axis 5 | agreed | medium | lexemes: ayman

Allah will not hold you for unintentional oaths

Locus Q 2:225. Study gloss (not a translation authority): Allah will not hold you for unintentional oaths. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:235

Axis 5 | agreed | medium | lexemes: uqud

No sin in hint at engagement before contract

Locus Q 2:235. Study gloss (not a translation authority): No sin in hint at engagement before contract. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:237

Axis 5 | agreed | medium | lexemes: uqud

Kindness when dissolving before consummation

Locus Q 2:237. Study gloss (not a translation authority): Kindness when dissolving before consummation. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:256

Axis 1 | agreed | medium | lexemes: urwa

No compulsion; urwa wuthqa firm handhold

Locus Q 2:256. Study gloss (not a translation authority): No compulsion; urwa wuthqa firm handhold. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Al-urwa al-wuthqa is the firm handhold — covenant fidelity pictured as holding to truth.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:282

Axis 5 | agreed | medium | lexemes: uqud

Write contracts when you incur debt

Locus Q 2:282. Study gloss (not a translation authority): Write contracts when you incur debt. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 2:286

Axis 1 | agreed | medium | lexemes: isr

Allah does not burden beyond capacity; no isr as before

Locus Q 2:286. Study gloss (not a translation authority): Allah does not burden beyond capacity; no isr as before. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Isr is compact-burden language; prophetic mithaq includes bearing revelation responsibly.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:76

Axis 1 | agreed | medium | lexemes: ahd

Who fulfills ahd and is godfearing

Locus Q 3:76. Study gloss (not a translation authority): Who fulfills ahd and is godfearing. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:77

Axis 1 | agreed | spine | lexemes: ahd, ayman

Sell Allah's ahd and oaths for small price

Locus Q 3:77. Study gloss (not a translation authority): Sell Allah's ahd and oaths for small price. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 3:77 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for

ratification/breach patterns before teaching.

Hadith links: H02

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:81

Axis 2 | agreed | spine | lexemes: mithaq, isr

Mithaq of prophets: believe and support confirming messenger

Locus Q 3:81. Study gloss (not a translation authority): Mithaq of prophets: believe and support confirming messenger. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses. Isr is compact-burden language; prophetic mithaq includes bearing revelation responsibly.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Continuity of revelation under covenant; Duty to believe and support the confirming messenger; Divine witnessing of the affirmation; Sunni tafsīr majority links to Muḥammad —formulate carefully (C4). Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 3:81 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:103

Axis 1 | agreed | medium | lexemes: urwa

Hold to rope of Allah together; do not divide

Locus Q 3:103. Study gloss (not a translation authority): Hold to rope of Allah together; do not divide. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Al-urwa al-wuthqa is the firm handhold — covenant fidelity pictured as holding to truth.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:104

Axis 4 | agreed | medium | lexemes: amr

Let there be group calling to good and forbidding wrong

Locus Q 3:104. Study gloss (not a translation authority): Let there be group calling to good and forbidding wrong. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'amr' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:110

Axis 4 | agreed | medium | lexemes: shahada

Ummah witness upon mankind if covenant charge upheld

Locus Q 3:110. Study gloss (not a translation authority): Ummah witness upon mankind if covenant charge upheld. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'shahada' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:159

Axis 4 | agreed | medium | lexemes: shura

Consult them in affairs; when decided trust Allah

Locus Q 3:159. Study gloss (not a translation authority): Consult them in affairs; when decided trust Allah. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'shura' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:183

Axis 3 | agreed | medium | lexemes: ahd

Claimed divine ahd restricting belief in messengers

Locus Q 3:183. Study gloss (not a translation authority): Claimed divine ahd restricting belief in messengers. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:187

Axis 3 | agreed | spine | lexemes: mithaq

Mithaq of People of Book: explain, do not conceal

Locus Q 3:187. Study gloss (not a translation authority): Mithaq of People of Book: explain, do not conceal. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 3:187 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 3:199

Axis 3 | *agreed* | *medium* | *lexemes: amanah*

Among People of Book those who believe and fulfill

Locus Q 3:199. Study gloss (not a translation authority): Among People of Book those who believe and fulfill. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:21

Axis 5 | *agreed* | *spine* | *lexemes: mithaq*

Marriage mithaq ghaliz between spouses

Locus Q 4:21. Study gloss (not a translation authority): Marriage mithaq ghaliz between spouses. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological, social.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Marriage carries *mithaq ghaliz*—same solemn adjective as Q 33:7; Family bond sits inside covenantal vocabulary without becoming Alast; Exemplifies multi-register overlap: legal aqd + theological solemnity. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 4:21 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:33

Axis 5 | agreed | medium | lexemes: uqud

Inheritance shares as Allah apportioned

Locus Q 4:33. Study gloss (not a translation authority): Inheritance shares as Allah apportioned. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:36

Axis 5 | agreed | medium | lexemes: amanah

Worship Allah; be kind to parents and relatives

Locus Q 4:36. Study gloss (not a translation authority): Worship Allah; be kind to parents and relatives. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:58

Axis 5 | agreed | medium | lexemes: amanah

Render amanat to those entitled

Locus Q 4:58. Study gloss (not a translation authority): Render amanat to those entitled. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Hadith links: H03

Q 4:86

Axis 5 | agreed | medium | lexemes: adab

Return greeting with equal or better

Locus Q 4:86. Study gloss (not a translation authority): Return greeting with equal or better. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'adab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Q 4:90

Axis 4 | agreed | medium | lexemes: mithaq

Except people with whom you have a mithaq

Locus Q 4:90. Study gloss (not a translation authority): Except people with whom you have a mithaq. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:92

Axis 4 | agreed | medium | lexemes: mithaq

If from people between you and them is mithaq

Locus Q 4:92. Study gloss (not a translation authority): If from people between you and them is mithaq. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:105

Axis 5 | agreed | medium | lexemes: shahada

We sent down Scripture for judging between people

Locus Q 4:105. Study gloss (not a translation authority): We sent down Scripture for judging between people. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'shahada' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:122

Axis 1 | agreed | medium | lexemes: wad

Promise of Allah is truth; never breaks His wad

Locus Q 4:122. Study gloss (not a translation authority): Promise of Allah is truth; never breaks His wad. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:135

Axis 5 | agreed | medium | lexemes: shahada

Stand firm for justice as witnesses to Allah

Locus Q 4:135. Study gloss (not a translation authority): Stand firm for justice as witnesses to Allah. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'shahada' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:145

Axis 1 | agreed | medium | lexemes: nifaq

Hypocrites in lowest depth of Fire

Locus Q 4:145. Study gloss (not a translation authority): Hypocrites in lowest depth of Fire. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:154

Axis 3 | agreed | spine | lexemes: mithaq

Raised mountain over them by their mithaq

Locus Q 4:154. Study gloss (not a translation authority): Raised mountain over them by their mithaq. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 4:154 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 4:155

Axis 3 | agreed | spine | lexemes: mithaq

Breaking mithaq and disbelief brought curse

Locus Q 4:155. Study gloss (not a translation authority): Breaking mithaq and disbelief brought curse. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 4:155 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:1

Axis 5 | *agreed* | *spine* | *lexemes: uqud*

Fulfill the contracts (uqud)

Locus Q 5:1. Study gloss (not a translation authority): Fulfill the contracts (uqud). Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Direct command to believers: *awf bi-l-uqud*; Anchors Axis 5 legal-ethical register; Opens Surat al-Maidah's legislation under fidelity ethic; [fiqh] develops contract types; theology tracks the virtue of fulfillment. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 5:1 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H22

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:2

Axis 5 | agreed | medium | lexemes: haram

Do not violate symbols of Allah or sacred months

Locus Q 5:2. Study gloss (not a translation authority): Do not violate symbols of Allah or sacred months. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'haram' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:7

Axis 1,4 | agreed | medium | lexemes: mithaq

Remember Allah's mithaq He bound you with

Locus Q 5:7. Study gloss (not a translation authority): Remember Allah's mithaq He bound you with. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,4. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:8

Axis 5 | agreed | medium | lexemes: adl

Be just; nearest to taqwa; fear Allah

Locus Q 5:8. Study gloss (not a translation authority): Be just; nearest to taqwa; fear Allah. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'adl' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:12

Axis 3 | agreed | spine | lexemes: mithaq

Allah took mithaq of Bani Israil; twelve chiefs

Locus Q 5:12. Study gloss (not a translation authority): Allah took mithaq of Bani Israil; twelve chiefs. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 5:12 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:13

Axis 3 | agreed | spine | lexemes: mithaq

Breaking mithaq; cursed; hardened hearts

Locus Q 5:13. Study gloss (not a translation authority): Breaking mithaq; cursed; hardened hearts. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 5:13 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:14

Axis 3 | agreed | spine | lexemes: mithaq

Mithaq taken from those who say We are Christians

Locus Q 5:14. Study gloss (not a translation authority): Mithaq taken from those who say We are Christians. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 5:14 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:45

Axis 3 | agreed | medium | lexemes: kitab

Upon them in Torah: life for life

Locus Q 5:45. Study gloss (not a translation authority): Upon them in Torah: life for life. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:46

Axis 3 | agreed | medium | lexemes: kitab

Isa given Injil confirming Torah

Locus Q 5:46. Study gloss (not a translation authority): Isa given Injil confirming Torah. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:47

Axis 3 | agreed | medium | lexemes: kitab

People of Gospel judge by what Allah revealed

Locus Q 5:47. Study gloss (not a translation authority): People of Gospel judge by what Allah revealed. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:48

Axis 3 | agreed | medium | lexemes: kitab

To each scripture and method; compete in good

Locus Q 5:48. Study gloss (not a translation authority): To each scripture and method; compete in good. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:54

Axis 1 | agreed | medium | lexemes: iman

Do not turn back on heels after guidance

Locus Q 5:54. Study gloss (not a translation authority): Do not turn back on heels after guidance. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'iman' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:55

Axis 4 | agreed | medium | lexemes: wali

Allies are Allah, Messenger, believers

Locus Q 5:55. Study gloss (not a translation authority): Allies are Allah, Messenger, believers. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'wali' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:70

Axis 3 | agreed | spine | lexemes: mithaq

Mithaq of Bani Israil; messengers sent; then denial

Locus Q 5:70. Study gloss (not a translation authority): Mithaq of Bani Israil; messengers sent; then denial. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 5:70 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 5:89

Axis 5 | agreed | medium | lexemes: ayman

Expiation for broken oaths after confirmation

Locus Q 5:89. Study gloss (not a translation authority): Expiation for broken oaths after confirmation. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 6:151

Axis 1 | agreed | medium | lexemes: ahd

Sayings of covenant: tawhid ethics and justice

Locus Q 6:151. Study gloss (not a translation authority): Sayings of covenant: tawhid ethics and justice. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 6:152

Axis 1 | agreed | spine | lexemes: ahd

Fulfill Allah's ahd; He enjoined this upon you

Locus Q 6:152. Study gloss (not a translation authority): Fulfill Allah's ahd; He enjoined this upon you. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 6:152 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 6:153

Axis 1 | agreed | medium | lexemes: ahd

This is My path straight; follow; do not divide

Locus Q 6:153. Study gloss (not a translation authority): This is My path straight; follow; do not divide. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 6:154

Axis 3 | agreed | medium | lexemes: kitab

Musa given Scripture completing favor

Locus Q 6:154. Study gloss (not a translation authority): Musa given Scripture completing favor. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:102

Axis 3 | agreed | medium | lexemes: ahd

Most of them not found keeping covenant

Locus Q 7:102. Study gloss (not a translation authority): Most of them not found keeping covenant. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:134

Axis 3 | agreed | medium | lexemes: ahd

Plea to remove torment linked to covenanted belief

Locus Q 7:134. Study gloss (not a translation authority): Plea to remove torment linked to covenanted belief. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:145

Axis 2 | agreed | medium | lexemes: kitab

Tablets written for Mosa — mercy and detail

Locus Q 7:145. Study gloss (not a translation authority): Tablets written for Mosa — mercy and detail. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:157

Axis 2 | agreed | medium | lexemes: isr

Relief from burdens and shackles upon the Messenger

Locus Q 7:157. Study gloss (not a translation authority): Relief from burdens and shackles upon the Messenger. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Isr is compact-burden language; prophetic mithaq includes bearing revelation responsibly.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:169

Axis 3 | agreed | medium | lexemes: mithaq

Did not mithaq of Book bind them to Book of Allah

Locus Q 7:169. Study gloss (not a translation authority): Did not mithaq of Book bind them to Book of Allah. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:172

Axis 1 | agreed | spine | lexemes: mithaq, Alast

Alast: lordship question and testimony of progeny

Locus Q 7:172. Study gloss (not a translation authority): Alast: lordship question and testimony of progeny. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses. Alast (a-lastu bi-rabbikum) is the primordial lordship address; modality remains disputed (C1).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Lordship acknowledgment as covenant content; Universal scope (Ban■ ■dam's progeny); Eschatological anti-excuse design (172–173); Inherited shirk is not a valid final plea. Consult classical tafsir for full isnad and linguistic debate.

Contested register C1 applies. METHOD affirms the Qur'anic claim without importing foreign covenant frameworks; classical disagreement is preserved, not flattened.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 7:172 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H31

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 7:173

Axis 6 | *agreed* | *spine* | *lexemes: Alast*

Anti-excuse clauses for Day of Resurrection

Locus Q 7:173. Study gloss (not a translation authority): Anti-excuse clauses for Day of Resurrection. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Alast (a-lastu bi-rabbikum) is the primordial lordship address; modality remains disputed (C1).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Lordship acknowledgment as covenant content; Universal scope (Ban■ ■dam's progeny); Eschatological anti-excuse design (172–173); Inherited shirk is not a valid final plea. Consult classical tafsir for full isnad and linguistic debate.

Contested register C1 applies. METHOD affirms the Qur'anic claim without importing foreign covenant frameworks; classical disagreement is preserved, not flattened.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 7:173 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 8:27

Axis 5 | agreed | medium | lexemes: amanah

Do not betray amanah of Allah and the Messenger

Locus Q 8:27. Study gloss (not a translation authority): Do not betray amanah of Allah and the Messenger. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Hadith links: H01

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 8:56

Axis 4 | agreed | spine | lexemes: ahd

Those with whom you made ahd then break repeatedly

Locus Q 8:56. Study gloss (not a translation authority): Those with whom you made ahd then break repeatedly. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 8:56 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 8:58

Axis 4 | agreed | medium | lexemes: ahd

If treachery feared from ahd-party, announce equally

Locus Q 8:58. Study gloss (not a translation authority): If treachery feared from ahd-party, announce equally. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 8:60

Axis 4 | agreed | medium | lexemes: ahd

Prepare strength to deter enemy and ally of Allah

Locus Q 8:60. Study gloss (not a translation authority): Prepare strength to deter enemy and ally of Allah. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 8:72

Axis 4 | nuanced | medium | lexemes: mithaq

Alliance field until hijrah; read with siyar tafsir

Locus Q 8:72. Study gloss (not a translation authority): Alliance field until hijrah; read with siyar tafsir. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: nuanced. Keep textual frankness and justice together; avoid slogan collapse across axes.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:1

Axis 4 | agreed | medium | lexemes: ahd

Release from ahd with mushrikin after four months

Locus Q 9:1. Study gloss (not a translation authority): Release from ahd with mushrikin after four months. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:4

Axis 4 | agreed | spine | lexemes: ahd

Except those with ahd until term; then fulfill

Locus Q 9:4. Study gloss (not a translation authority): Except those with ahd until term; then fulfill. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 9:4 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:6

Axis 4 | agreed | medium | lexemes: ahd

Asylum for muahid seeking to hear Quran

Locus Q 9:6. Study gloss (not a translation authority): Asylum for muahid seeking to hear Quran. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:7

Axis 4 | agreed | spine | lexemes: ahd

No ahd for mushrikin except at Masjid al-Haram

Locus Q 9:7. Study gloss (not a translation authority): No ahd for mushrikin except at Masjid al-Haram. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 9:7 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:8

Axis 4 | agreed | medium | lexemes: ahd

They prefer you not to believe; break oaths repeatedly

Locus Q 9:8. Study gloss (not a translation authority): They prefer you not to believe; break oaths repeatedly. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:10

Axis 4 | agreed | medium | lexemes: ahd

Do not respect kinship or treaty with believers

Locus Q 9:10. Study gloss (not a translation authority): Do not respect kinship or treaty with believers. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:12

Axis 4 | agreed | spine | lexemes: ahd, ayman

Break oaths after ahd; attack religion

Locus Q 9:12. Study gloss (not a translation authority): Break oaths after ahd; attack religion. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 9:12 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:13

Axis 4 | agreed | medium | lexemes: ahd

Will you not fight people who broke oaths

Locus Q 9:13. Study gloss (not a translation authority): Will you not fight people who broke oaths. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:16

Axis 4 | agreed | medium | lexemes: iman

Do you think you will be left without trial

Locus Q 9:16. Study gloss (not a translation authority): Do you think you will be left without trial. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'iman' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:67

Axis 1 | agreed | medium | lexemes: nifaq

Hypocrites enjoin wrong and forbid right

Locus Q 9:67. Study gloss (not a translation authority): Hypocrites enjoin wrong and forbid right. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:68

Axis 1 | agreed | medium | lexemes: nifaq

Allah promises hypocrites Fire lowest depth

Locus Q 9:68. Study gloss (not a translation authority): Allah promises hypocrites Fire lowest depth. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:73

Axis 1 | agreed | medium | lexemes: nifaq

Strive against hypocrites and polytheists

Locus Q 9:73. Study gloss (not a translation authority): Strive against hypocrites and polytheists. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:75

Axis 1 | agreed | medium | lexemes: ahd

Some made ahd with Allah: if given wealth we will spend

Locus Q 9:75. Study gloss (not a translation authority): Some made ahd with Allah: if given wealth we will spend. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:77

Axis 1 | agreed | medium | lexemes: ahd

Hypocrisy sealed for breaking what they ahadu Allah

Locus Q 9:77. Study gloss (not a translation authority): Hypocrisy sealed for breaking what they ahadu Allah. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Hadith links: H02

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:96

Axis 4 | agreed | medium | lexemes: ahd

Hard against disbelievers; merciful among themselves

Locus Q 9:96. Study gloss (not a translation authority): Hard against disbelievers; merciful among themselves. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 9:111

Axis 1,6 | agreed | spine | lexemes: ahd, wad

Allah purchased believers' lives and wealth for Paradise

Locus Q 9:111. Study gloss (not a translation authority): Allah purchased believers' lives and wealth for Paradise. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,6. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Covenantal "sale/purchase" metaphor of devoted belief; Allah's ■ahd as the most faithful; Continuity of the promise across scriptures (as Qur'an states); Eschatological joy in the bargain (*bay■*). Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 9:111 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 10:47

Axis 2 | agreed | medium | lexemes: rusul

Messenger for every nation; obey when sent

Locus Q 10:47. Study gloss (not a translation authority): Messenger for every nation; obey when sent. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'rusul' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 11:17

Axis 2 | agreed | medium | lexemes: shahada

Witness from Allah like one with Scripture

Locus Q 11:17. Study gloss (not a translation authority): Witness from Allah like one with Scripture. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'shahada' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 12:66

Axis 5 | agreed | medium | lexemes: mawthiq

Yaqub takes mawthiq from sons regarding Benjamin

Locus Q 12:66. Study gloss (not a translation authority): Yaqub takes mawthiq from sons regarding Benjamin. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Mawthiq is a taken bond in narrative contexts (Yusuf), analogous to solemn pledge.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 12:80

Axis 5 | agreed | medium | lexemes: mawthiq

Will not leave land until father permits or Allah decides

Locus Q 12:80. Study gloss (not a translation authority): Will not leave land until father permits or Allah decides. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Mawthiq is a taken bond in narrative contexts (Yusuf), analogous to solemn pledge.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 12:111

Axis 2 | agreed | medium | lexemes: ahd

In their stories instruction for ulu albab

Locus Q 12:111. Study gloss (not a translation authority): In their stories instruction for ulu albab. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 13:20

Axis 1 | agreed | spine | lexemes: ahd, mithaq

Fulfill ahd of Allah; do not break mithaq

Locus Q 13:20. Study gloss (not a translation authority): Fulfill ahd of Allah; do not break mithaq. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 13:20 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 13:25

Axis 1 | agreed | spine | lexemes: ahd, mithaq

Break ahd after ratification; cut what Allah joined

Locus Q 13:25. Study gloss (not a translation authority): Break ahd after ratification; cut what Allah joined. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 13:25 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 14:22

Axis 6 | agreed | medium | lexemes: wad

Shaytan's broken wad on Day of Judgment

Locus Q 14:22. Study gloss (not a translation authority): Shaytan's broken wad on Day of Judgment. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 14:34

Axis 1 | agreed | medium | lexemes: ni'mah

If you count favors of Allah you cannot enumerate

Locus Q 14:34. Study gloss (not a translation authority): If you count favors of Allah you cannot enumerate. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'ni'mah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:90

Axis 5 | agreed | medium | lexemes: adl

Allah commands justice, ihsan, and giving to kin

Locus Q 16:90. Study gloss (not a translation authority): Allah commands justice, ihsan, and giving to kin. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'adl' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:91

Axis 1,5 | agreed | spine | lexemes: ahd, ayman

Fulfill ahd; do not break confirmed oaths; Allah kafil

Locus Q 16:91. Study gloss (not a translation authority): Fulfill ahd; do not break confirmed oaths; Allah kafil. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,5. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Command: *awfi bi-ahdi li-h*; Oaths after *tawkid* (confirmation) must not be broken; Allah as *kafil* (surety/guarantor) over the pledge; Bridges theological fidelity and interpersonal oath ethics. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 16:91 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H25

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:95

Axis 1 | agreed | medium | lexemes: ahd

Do not sell Allah's ahd for small price

Locus Q 16:95. Study gloss (not a translation authority): Do not sell Allah's ahd for small price. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:96

Axis 1 | agreed | medium | lexemes: wad

What is with Allah better than worldly diversion

Locus Q 16:96. Study gloss (not a translation authority): What is with Allah better than worldly diversion. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:97

Axis 1 | agreed | medium | lexemes: flah

Righteous life and good deeds — best reward

Locus Q 16:97. Study gloss (not a translation authority): Righteous life and good deeds — best reward. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 16:120

Axis 2 | agreed | medium | lexemes: awfa

Ibrahim ummah obedient; hanif; awfa bi-ahd

Locus Q 16:120. Study gloss (not a translation authority): Ibrahim ummah obedient; hanif; awfa bi-ahd. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'awfa' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 17:7

Axis 3 | agreed | medium | lexemes: ahd

If you do good you do for yourselves

Locus Q 17:7. Study gloss (not a translation authority): If you do good you do for yourselves. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 17:23

Axis 5 | agreed | medium | lexemes: uqud

Kindness to parents; do not say uff

Locus Q 17:23. Study gloss (not a translation authority): Kindness to parents; do not say uff. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 17:34

Axis 1,6 | agreed | spine | lexemes: ahd

Fulfill the ahd; ahd will be questioned

Locus Q 17:34. Study gloss (not a translation authority): Fulfill the ahd; ahd will be questioned. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,6. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 17:34 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H45

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 17:35

Axis 5 | agreed | medium | lexemes: uqud

Fulfill measure and balance with justice

Locus Q 17:35. Study gloss (not a translation authority): Fulfill measure and balance with justice. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 18:30

Axis 1 | agreed | medium | lexemes: wad

Whoever does righteous deeds — best reward

Locus Q 18:30. Study gloss (not a translation authority): Whoever does righteous deeds — best reward. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 18:46

Axis 1 | agreed | medium | lexemes: akhirah

Wealth and children adornment; lasting deeds better

Locus Q 18:46. Study gloss (not a translation authority): Wealth and children adornment; lasting deeds better. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'akhirah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 19:78

Axis 2 | agreed | medium | lexemes: ahd

Has he taken ahd with the Most Merciful unseen

Locus Q 19:78. Study gloss (not a translation authority): Has he taken ahd with the Most Merciful unseen. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 19:87

Axis 6 | agreed | medium | lexemes: ahd

Intercession only for who took ahd with Most Merciful

Locus Q 19:87. Study gloss (not a translation authority): Intercession only for who took ahd with Most Merciful. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 19:96

Axis 1 | agreed | medium | lexemes: flah

Those who believe and do righteous — Rahman will grant love

Locus Q 19:96. Study gloss (not a translation authority): Those who believe and do righteous — Rahman will grant love. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 20:86

Axis 2 | agreed | medium | lexemes: ahd

Did your Lord fail you in promise after leaving Mosa

Locus Q 20:86. Study gloss (not a translation authority): Did your Lord fail you in promise after leaving Mosa. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 20:115

Axis 2 | agreed | spine | lexemes: ahd

Ahd taken from Adam; he forgot; no firm resolve

Locus Q 20:115. Study gloss (not a translation authority): Ahd taken from Adam; he forgot; no firm resolve. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Prophetic charge can be forgotten; Lack of *■azm* (resolve) as moral diagnosis; Complements prophetic m■th■q texts: office is weighty and trial-laden; Not a denial of ■dam's prophetic status in Sunni creed. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 20:115 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 20:132

Axis 1 | agreed | medium | lexemes: salah

Command family to prayer; be steadfast

Locus Q 20:132. Study gloss (not a translation authority): Command family to prayer; be steadfast. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'salah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 21:48

Axis 2 | agreed | medium | lexemes: kitab

Musa and Harun given furqan and reminder

Locus Q 21:48. Study gloss (not a translation authority): Musa and Harun given furqan and reminder. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 21:105

Axis 3 | agreed | medium | lexemes: kitab

Righteous inherit the land in Zabur

Locus Q 21:105. Study gloss (not a translation authority): Righteous inherit the land in Zabur. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 22:30

Axis 5 | agreed | medium | lexemes: haram

Avoid rjs of idols; fulfill word to Allah

Locus Q 22:30. Study gloss (not a translation authority): Avoid rjs of idols; fulfill word to Allah. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'haram' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 22:78

Axis 1 | agreed | medium | lexemes: din

Strive for Allah as He deserves; complete religion

Locus Q 22:78. Study gloss (not a translation authority): Strive for Allah as He deserves; complete religion. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'din' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 23:1

Axis 1 | agreed | medium | lexemes: flah

Successful indeed are the believers

Locus Q 23:1. Study gloss (not a translation authority): Successful indeed are the believers. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 23:8

Axis 1,5 | agreed | spine | lexemes: ahd, amanah

Successful believers keep amanat and ahd

Locus Q 23:8. Study gloss (not a translation authority): Successful believers keep amanat and ahd. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,5. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 23:8 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 23:117

Axis 1 | agreed | medium | lexemes: tawhid

Who invokes besides Allah without proof — account

Locus Q 23:117. Study gloss (not a translation authority): Who invokes besides Allah without proof — account. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'tawhid' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 24:22

Axis 5 | agreed | medium | lexemes: ayman

Do not let oaths prevent doing good and reconciling

Locus Q 24:22. Study gloss (not a translation authority): Do not let oaths prevent doing good and reconciling. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 24:33

Axis 5 | agreed | medium | lexemes: uqud

Marry those who seek marriage; make uqud if chaste

Locus Q 24:33. Study gloss (not a translation authority): Marry those who seek marriage; make uqud if chaste. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 24:37

Axis 1 | agreed | medium | lexemes: ibadah

Men whom trade does not distract from remembrance

Locus Q 24:37. Study gloss (not a translation authority): Men whom trade does not distract from remembrance. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Worship is the telos of creation (51:56) and the living answer to the Alast testimony.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 24:53

Axis 4 | agreed | medium | lexemes: ayman

They swear strongest oaths by Allah to obey Messenger

Locus Q 24:53. Study gloss (not a translation authority): They swear strongest oaths by Allah to obey Messenger. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 24:55

Axis 4 | agreed | medium | lexemes: wad

Allah promised successors on earth if establish worship

Locus Q 24:55. Study gloss (not a translation authority): Allah promised successors on earth if establish worship. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 25:70

Axis 1 | agreed | medium | lexemes: tawba

Good deeds replace evil; Allah forgiving merciful

Locus Q 25:70. Study gloss (not a translation authority): Good deeds replace evil; Allah forgiving merciful. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'tawba' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 28:83

Axis 6 | agreed | medium | lexemes: akhirah

Home of akhirah assigned for those not seeking exaltation

Locus Q 28:83. Study gloss (not a translation authority): Home of akhirah assigned for those not seeking exaltation. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'akhirah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 29:69

Axis 1 | agreed | medium | lexemes: jihad

Strive for Allah; He guides to His paths

Locus Q 29:69. Study gloss (not a translation authority): Strive for Allah; He guides to His paths. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'jihad' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 30:6

Axis 1 | agreed | medium | lexemes: wad

Allah does not break His promise (wad)

Locus Q 30:6. Study gloss (not a translation authority): Allah does not break His promise (wad). Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 31:22

Axis 1 | agreed | medium | lexemes: urwa

Hold to urwa wuthqa; Allah hearing knowing

Locus Q 31:22. Study gloss (not a translation authority): Hold to urwa wuthqa; Allah hearing knowing. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Al-urwa al-wuthqa is the firm handhold — covenant fidelity pictured as holding to truth.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:1

Axis 4 | *agreed* | *medium* | *lexemes: bayah*

Obey Allah and Messenger; do not turn away when called

Locus Q 33:1. Study gloss (not a translation authority): Obey Allah and Messenger; do not turn away when called. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Bayah is pledge of allegiance; Q 48:10 elevates it as bayah to Allah through the Messenger.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:7

Axis 2 | *agreed* | *spine* | *lexemes: mithaq*

Solemn mithaq from prophets including final Messenger

Locus Q 33:7. Study gloss (not a translation authority): Solemn mithaq from prophets including final Messenger. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Prophethood under divine compact; Emphasis on the Prophet ﷺ by fronting “from you”; Naming of ﷺ al-ʿazm cluster (in many tafsīr readings); Parallel solemnity language with Q 4:21 (muthaq ghalib). Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 33:7 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:15

Axis 4 | agreed | spine | lexemes: ahd

Prior ahd with Allah not to turn backs in battle

Locus Q 33:15. Study gloss (not a translation authority): Prior ahd with Allah not to turn backs in battle. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 33:15 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:23

Axis 4 | agreed | spine | lexemes: ahd

Men true to what they ahadu Allah upon

Locus Q 33:23. Study gloss (not a translation authority): Men true to what they ahadu Allah upon. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 33:23 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:35

Axis 1 | agreed | medium | lexemes: flah

Muslim men and women — Allah prepared forgiveness

Locus Q 33:35. Study gloss (not a translation authority): Muslim men and women — Allah prepared forgiveness. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:56

Axis 4 | agreed | medium | lexemes: salawat

Allah and angels send blessings upon the Prophet

Locus Q 33:56. Study gloss (not a translation authority): Allah and angels send blessings upon the Prophet. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'salawat' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:71

Axis 4 | agreed | medium | lexemes: flah

He will improve deeds and forgive sins

Locus Q 33:71. Study gloss (not a translation authority): He will improve deeds and forgive sins. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 33:72

Axis 1 | agreed | spine | lexemes: amanah

Cosmic amanah offered; human bearing

Locus Q 33:72. Study gloss (not a translation authority): Cosmic amanah offered; human bearing. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 33:72 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for

ratification/breach patterns before teaching.

Hadith links: H40

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 35:18

Axis 6 | *agreed* | *medium* | *lexemes: isr*

No bearer of burden bears another's burden

Locus Q 35:18. Study gloss (not a translation authority): No bearer of burden bears another's burden. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Isr is compact-burden language; prophetic mithaq includes bearing revelation responsibly.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 35:32

Axis 3 | agreed | medium | lexemes: kitab

We bequeathed Book to those We chose

Locus Q 35:32. Study gloss (not a translation authority): We bequeathed Book to those We chose. Axis 3 addresses Allah's compacts with scripture peoples, especially Bani Israil: charters taken, terms named, breach and consequence recorded.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 3. Registers in view: theological.

Lexeme field: The field term 'kitab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 36:60

Axis 1,6 | agreed | spine | lexemes: ahd

Ahd with Bani Adam not to worship Shaytan

Locus Q 36:60. Study gloss (not a translation authority): Ahd with Bani Adam not to worship Shaytan. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,6. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 36:60 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 39:41

Axis 1 | agreed | medium | lexemes: hudan

Quran guidance and healing for believers

Locus Q 39:41. Study gloss (not a translation authority): Quran guidance and healing for believers. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'hudan' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 40:77

Axis 1 | agreed | medium | lexemes: sabr

Be patient; promise of Allah is true

Locus Q 40:77. Study gloss (not a translation authority): Be patient; promise of Allah is true. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'sabr' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 41:30

Axis 6 | agreed | medium | lexemes: malaika

Angels descend on those who say our Lord is Allah

Locus Q 41:30. Study gloss (not a translation authority): Angels descend on those who say our Lord is Allah. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'malaika' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 42:38

Axis 4 | agreed | medium | lexemes: shura

Respond to Lord; establish prayer; shura among them

Locus Q 42:38. Study gloss (not a translation authority): Respond to Lord; establish prayer; shura among them. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'shura' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 43:49

Axis 2 | agreed | medium | lexemes: ahd

Invoke Lord by what He ahida with you

Locus Q 43:49. Study gloss (not a translation authority): Invoke Lord by what He ahida with you. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 45:23

Axis 1 | agreed | medium | lexemes: hawa

Who follows hawa without guidance from Allah

Locus Q 45:23. Study gloss (not a translation authority): Who follows hawa without guidance from Allah. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'hawa' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 46:9

Axis 2 | agreed | medium | lexemes: risalah

I am not first messenger; know not what done with me

Locus Q 46:9. Study gloss (not a translation authority): I am not first messenger; know not what done with me. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'risalah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 47:4

Axis 4 | nuanced | medium | lexemes: wathaq

Wathaq fetters in war context

Locus Q 47:4. Study gloss (not a translation authority): Wathaq fetters in war context. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: political.

Lexeme field: The field term 'wathaq' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: nuanced. Keep textual frankness and justice together; avoid slogan collapse across axes.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 48:4

Axis 4 | agreed | medium | lexemes: sakinah

He sent sakinah on believers to increase iman

Locus Q 48:4. Study gloss (not a translation authority): He sent sakinah on believers to increase iman. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'sakinah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 48:10

Bayah to Messenger is bayah to Allah

Locus Q 48:10. Study gloss (not a translation authority): Bayah to Messenger is bayah to Allah. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Bayah is pledge of allegiance; Q 48:10 elevates it as bayah to Allah through the Messenger. Ahd marks charge, pledge, or commitment language toward Allah or among parties.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Dossier synthesis (sources/ayah-dossiers): Bay■ah to Messenger = bay■ah to Allah; Breach harms the breaker; Fulfillment (*awf■ bim■ ■■hada*) brings great reward; Axis 4 theological elevation of Prophetic pledge. Consult classical tafsir for full isnad and linguistic debate.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 48:10 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H10

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 48:18

Axis 4 | agreed | spine | lexemes: bayah

Allah pleased with believers under tree bayah

Locus Q 48:18. Study gloss (not a translation authority): Allah pleased with believers under tree bayah. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Bayah is pledge of allegiance; Q 48:10 elevates it as bayah to Allah through the Messenger.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 48:18 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H13

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 48:29

Axis 4 | agreed | medium | lexemes: ukhuwwah

Compassion among them; sign for believers

Locus Q 48:29. Study gloss (not a translation authority): Compassion among them; sign for believers. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'ukhuwwah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 49:10

Axis 4 | agreed | medium | lexemes: ukhuwwah

Believers are brothers; reconcile between them

Locus Q 49:10. Study gloss (not a translation authority): Believers are brothers; reconcile between them. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'ukhuwwah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 49:12

Axis 5 | agreed | medium | lexemes: amanah

Do not spy or backbite — breach of trust

Locus Q 49:12. Study gloss (not a translation authority): Do not spy or backbite — breach of trust. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 49:15

Axis 4 | agreed | medium | lexemes: iman

True believers are those who believe and strive

Locus Q 49:15. Study gloss (not a translation authority): True believers are those who believe and strive. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'iman' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 51:56

Axis 1 | agreed | medium | lexemes: ibadah

Created jinn and humans except to worship Me

Locus Q 51:56. Study gloss (not a translation authority): Created jinn and humans except to worship Me. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological, worship.

Lexeme field: Worship is the telos of creation (51:56) and the living answer to the Alast testimony.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 55:60

Axis 6 | agreed | medium | lexemes: wad

Is reward of good anything but good

Locus Q 55:60. Study gloss (not a translation authority): Is reward of good anything but good. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 57:8

Axis 1 | agreed | spine | lexemes: mithaq

He took your mithaq; why disbelieve

Locus Q 57:8. Study gloss (not a translation authority): He took your mithaq; why disbelieve. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 57:8 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 57:10

Axis 1 | agreed | medium | lexemes: infaq

Spend before death comes; then no delay

Locus Q 57:10. Study gloss (not a translation authority): Spend before death comes; then no delay. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'infaq' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 57:25

Axis 4 | agreed | medium | lexemes: adl

We sent messengers with clear proofs and balance

Locus Q 57:25. Study gloss (not a translation authority): We sent messengers with clear proofs and balance. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'adl' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 58:11

Axis 4 | agreed | medium | lexemes: adab

Allah will raise those who believe and given knowledge

Locus Q 58:11. Study gloss (not a translation authority): Allah will raise those who believe and given knowledge. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'adab' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 58:18

Axis 5 | agreed | medium | lexemes: ayman

They will swear to Allah as they swear to you

Locus Q 58:18. Study gloss (not a translation authority): They will swear to Allah as they swear to you. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 58:22

Axis 4 | agreed | medium | lexemes: wali

No wala for those who oppose Allah and Messenger

Locus Q 58:22. Study gloss (not a translation authority): No wala for those who oppose Allah and Messenger. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'wali' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 59:7

Axis 4 | agreed | medium | lexemes: bayah

Do not prefer others over Messenger in decisions

Locus Q 59:7. Study gloss (not a translation authority): Do not prefer others over Messenger in decisions. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Bayah is pledge of allegiance; Q 48:10 elevates it as bayah to Allah through the Messenger.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 59:18

Axis 6 | agreed | medium | lexemes: akhirah

Fear Day when no soul suffices another

Locus Q 59:18. Study gloss (not a translation authority): Fear Day when no soul suffices another. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'akhirah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 60:1

Axis 4 | agreed | medium | lexemes: mithaq

Test regarding taking enemies as allies after mithaq

Locus Q 60:1. Study gloss (not a translation authority): Test regarding taking enemies as allies after mithaq. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Mithaq denotes a solemn, ratified compact — often paired with ahd in fulfillment verses.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 60:8

Axis 4 | agreed | medium | lexemes: dhimma

Allah does not forbid kindness to non-belligerent

Locus Q 60:8. Study gloss (not a translation authority): Allah does not forbid kindness to non-belligerent. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'dhimma' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 60:9

Axis 4 | agreed | medium | lexemes: dhimma

Forbidden alliance with those who fight you for religion

Locus Q 60:9. Study gloss (not a translation authority): Forbidden alliance with those who fight you for religion. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: The field term 'dhimma' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 60:12

Axis 4 | *agreed* | *spine* | *lexemes: bayah*

Bayah of believing women upon conditions

Locus Q 60:12. Study gloss (not a translation authority): Bayah of believing women upon conditions. Axis 4 covers the Prophet's community bond: bayah, treaties, loyalty limits, and political-social pledges under shar'i bounds.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 4. Registers in view: theological.

Lexeme field: Bayah is pledge of allegiance; Q 48:10 elevates it as bayah to Allah through the Messenger.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 60:12 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for ratification/breach patterns before teaching.

Hadith links: H12

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 61:10

Axis 6 | agreed | medium | lexemes: bay

Allah's bay: believe and strive for forgiveness

Locus Q 61:10. Study gloss (not a translation authority): Allah's bay: believe and strive for forgiveness. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'bay' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 61:11

Axis 6 | agreed | medium | lexemes: bay

Believe in Allah and strive with wealth and lives

Locus Q 61:11. Study gloss (not a translation authority): Believe in Allah and strive with wealth and lives. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'bay' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 61:12

Axis 6 | agreed | medium | lexemes: wad

He will forgive sins and admit gardens

Locus Q 61:12. Study gloss (not a translation authority): He will forgive sins and admit gardens. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: Wa'd is divine promise; Allah does not break His wad (30:6), unlike Shaytan (14:22).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 63:1

Axis 1 | agreed | medium | lexemes: nifaq

Hypocrites profess witness that you are Messenger

Locus Q 63:1. Study gloss (not a translation authority): Hypocrites profess witness that you are Messenger. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 63:4

Axis 1 | agreed | medium | lexemes: nifaq

Harsh appearance; speech like blocked wood beams

Locus Q 63:4. Study gloss (not a translation authority): Harsh appearance; speech like blocked wood beams. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Nifaq (hypocrisy) manifests as broken word and betrayed trust — antonym of covenant keeping.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 64:11

Axis 1 | agreed | medium | lexemes: qadar

No affliction except by permission of Allah

Locus Q 64:11. Study gloss (not a translation authority): No affliction except by permission of Allah. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'qadar' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 64:16

Axis 1 | agreed | medium | lexemes: taqwa

Fear Allah as He should be feared; listen and obey

Locus Q 64:16. Study gloss (not a translation authority): Fear Allah as He should be feared; listen and obey. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'taqwa' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 64:18

Axis 1 | agreed | medium | lexemes: alim

Allah knows what you conceal and declare

Locus Q 64:18. Study gloss (not a translation authority): Allah knows what you conceal and declare. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'alim' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 65:2

Axis 5 | agreed | medium | lexemes: uqud

When term ends hold them honorably or release honorably

Locus Q 65:2. Study gloss (not a translation authority): When term ends hold them honorably or release honorably. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Uqud are binding contracts; Q 5:1 places commercial and social pacts inside obedience.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 66:2

Axis 5 | agreed | medium | lexemes: ayman

Allah ordained release from oaths; keep covenant with Allah

Locus Q 66:2. Study gloss (not a translation authority): Allah ordained release from oaths; keep covenant with Allah. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Ayman are oaths; confirmed oaths must not be broken (16:91), with expiation paths (5:89).

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 66:6

Axis 5 | agreed | medium | lexemes: amanah

Protect yourselves and families from Fire

Locus Q 66:6. Study gloss (not a translation authority): Protect yourselves and families from Fire. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 68:4

Axis 2 | agreed | medium | lexemes: khuluq

You are upon exalted standard of character

Locus Q 68:4. Study gloss (not a translation authority): You are upon exalted standard of character. Axis 2 treats prophetic covenants: solemn mithaq upon messengers, continuity of revelation, and fidelity in conveying the charge.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 2. Registers in view: theological.

Lexeme field: The field term 'khuluq' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 70:32

Axis 1,5 | agreed | spine | lexemes: ahd, amanah

Keepers of trusts and ahd

Locus Q 70:32. Study gloss (not a translation authority): Keepers of trusts and ahd. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1,5. Registers in view: theological.

Lexeme field: Ahd marks charge, pledge, or commitment language toward Allah or among parties. Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Spine pedagogy: prioritize Q 70:32 in proof sheets, course weeks, and cross-axis maps. Pair with linked hadith only after the ayah; never substitute a weak report for the ayah. Read adjacent loci for

ratification/breach patterns before teaching.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 73:20

Axis 1 | agreed | medium | lexemes: ibadah

Recite what is easy of Quran; establish prayer

Locus Q 73:20. Study gloss (not a translation authority): Recite what is easy of Quran; establish prayer. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: Worship is the telos of creation (51:56) and the living answer to the Alast testimony.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 76:7

Axis 5 | agreed | medium | lexemes: nadhr

Fulfill nadhr and fear day of widespread calamity

Locus Q 76:7. Study gloss (not a translation authority): Fulfill nadhr and fear day of widespread calamity. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'nadhr' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 76:8

Axis 5 | agreed | medium | lexemes: infaq

They give food despite love for it to needy

Locus Q 76:8. Study gloss (not a translation authority): They give food despite love for it to needy. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: The field term 'infaq' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 89:16

Axis 5 | agreed | medium | lexemes: amanah

When tried with affliction he despairs and turns ungrateful

Locus Q 89:16. Study gloss (not a translation authority): When tried with affliction he despairs and turns ungrateful. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 89:17

Axis 5 | agreed | medium | lexemes: amanah

Do not honor orphan or urge feeding poor

Locus Q 89:17. Study gloss (not a translation authority): Do not honor orphan or urge feeding poor. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 89:26

Axis 6 | agreed | medium | lexemes: wathaq

None wathaq on that Day except by His permission

Locus Q 89:26. Study gloss (not a translation authority): None wathaq on that Day except by His permission. Axis 6 orients covenant language toward the akhirah: questioning, purchase, broken promises of Shaytan, and final accountability.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 6. Registers in view: theological.

Lexeme field: The field term 'wathaq' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 90:17

Axis 5 | agreed | medium | lexemes: amanah

Then being among those who believe and counsel patience

Locus Q 90:17. Study gloss (not a translation authority): Then being among those who believe and counsel patience. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 103:3

Axis 1 | agreed | medium | lexemes: flah

Except those who believe, do good, counsel truth and patience

Locus Q 103:3. Study gloss (not a translation authority): Except those who believe, do good, counsel truth and patience. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'flah' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 107:7

Axis 5 | agreed | medium | lexemes: amanah

They refuse small kindnesses — breach of social trust

Locus Q 107:7. Study gloss (not a translation authority): They refuse small kindnesses — breach of social trust. Axis 5 spans interpersonal registers: uqud, marriage mithaq, oaths, and amanah rendered among people in Allah's name.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 5. Registers in view: theological.

Lexeme field: Amanah is trust — cosmic (33:72) and social (4:58) — breach of which undermines faith integrity.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Q 112:1

Axis 1 | agreed | medium | lexemes: tawhid

Say He is Allah One — foundation of primordial bond

Locus Q 112:1. Study gloss (not a translation authority): Say He is Allah One — foundation of primordial bond. Axis 1 maps the bond between Allah and humanity: lordship acknowledged, charges kept or sold, worship aligned with the primordial testimony.

Parties and act: identify who binds whom, what speech or charge is taken, and whether the scene is primordial, prophetic, communal, interpersonal, or eschatological. Primary axis tag(s): 1. Registers in view: theological.

Lexeme field: The field term 'tawhid' appears in covenant registers mapped to this locus.

Content of the bond: extract the obligation, promise, trust, treaty, or testimony content from the ayah itself before importing later system language. Consequence: note keepers vs breakers, worldly censure, and/or akhirah recall where the text indicates it.

Status: agreed core for covenantal reading at Intermediate level. Ultimate synthesis must still cite this locus before system-wide claims.

Classical consultation path: Tabari (athar range), Ibn Kathir (narrative synthesis), Qurtubi (fiqh-ethical turns), Razi (kalam options). Do not treat this note as a substitute for those works or for qualified teachers.

Pointers: Tabari; Ibn Kathir; Qurtubi; Razi

Part II — Hadith Notes

H01: Signs of hypocrite: lies, breaks promise, betrays trust

Collections: Bukhari, Muslim | Grade: sahih | Axis: 1,5

Amanah and ahd ethic

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 4:58, Q 8:27, Q 23:8

H02: Four traits of hypocrisy including treachery when covenanting

Collections: Bukhari, Muslim | Grade: sahih | Axis: 1,5

Covenant fidelity vs nifaq

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 2:27, Q 9:77, Q 3:77

H03: Render the trust to the one who entrusted you

Collections: Abu Dawud, Tirmidhi | Grade: verify | Axis: 5

Amanah rendering

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 4:58, Q 33:72

H04: Whoever does not fulfill trust has no iman

Collections: Tabarani | Grade: verify | Axis: 5

Trust and faith bond

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 8:27, Q 70:32

H05: Believer is one from whose tongue and hand Muslims are safe

Collections: Bukhari, Muslim | Grade: sahih | Axis: 5

Social safety as covenant sign

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 49:10, Q 23:8

H06: Muslim is brother of Muslim; he does not wrong him

Collections: Bukhari, Muslim | Grade: sahih | Axis: 4,5

Brotherhood obligation

Mithaq reading: place this report under the Sunnah layer of METHOD only after the linked Qur'an loci are read. Prefer Bukhari/Muslim for Intermediate teaching; mark verify/disputed grades before doctrinal use. Pair fidelity themes (promise, trust, bayah, muahid) with Axis tags already assigned in the catalog.

Qur'an links: Q 49:10, Q 58:22

H07: Do not envy, hate, or turn backs on one another
